

LOGZILLA DOCUMENTATION

Alerts Overview

LogZilla triggered alerts provide northbound notification, automation, and correlation hooks that fire on filters for severity, hostname, or search terms

Alerts · Generated June 11, 2026 · logzilla.ai/docs/alerts/alerts-overview

Triggered alerts provide various northbound mechanisms to allow the system to notify, automate, and even correlate events which allow users to stay on top of potential problems, track system configuration changes, automate repetitive tasks, etc.
