

LOGZILLA DOCUMENTATION

Upgrade LogZilla

Run `sudo logzilla upgrade` to pull the latest LogZilla containers and restart services in-place, typically within a few minutes

Getting Started with LogZilla · Generated April 27, 2026 · logzilla.ai/docs/getting-started/upgrade

Upgrading LogZilla pulls the latest containers and restarts the services. Run the following with root privileges:

```
sudo logzilla upgrade
```

The upgrade is in-place and typically completes within a few minutes.
