# /api/dictionaries/{name}

REST API endpoint: /api/dictionaries/{name}

REST API Reference · Generated April 29, 2026 · [logzilla.ai/docs/rest-api-reference/api-dictionaries-name](https://logzilla.ai/docs/rest-api-reference/api-dictionaries-name)

# /api/dictionaries/{name}

## GET

**Summary:** Get details of particular dictionary by dictionary name

If dictionary is static, then all values will be returned; if it is dynamic, then no more than 'limit' will be returned from the ones matching 'pattern'.

## Parameters

Name	Type	Required	Description
name	string	Yes	
no_cache	boolean	No	Do not use cache for dictionary types
pattern	string	No	Filter by substring (dynamic dictionaries only)
limit	integer	No	Limit items to given number (dynamic dictionaries only)
show_last_seen	boolean	No	Show last seen time
last_seen_from	string	No	Show only last seen newer than given time. Time format: epoch [s] or negative number with unit [h (hours), d (days)] can be provided to get time relative to current.
last_seen_to	string	No	Show only last seen older than given time. Time format: epoch [s] or negative number with unit [h (hours), d (days)] can be provided to get time relative to current.
