

LOGZILLA DOCUMENTATION

/api/sec/reload

REST API endpoint: /api/sec/reload

REST API Reference · Generated September 22, 2026 · logzilla.ai/docs/rest-api-reference/api-sec-reload

/api/sec/reload

POST

Summary: Reload all SEC instances

Re-reads /etc/logzilla/sec: instances whose files changed are restarted, instances whose directory is gone are dropped, new directories are started. An instance with an invalid config.yaml is reported with 422 and nothing is reloaded.

Parameters

Name	Type	Required	Description
force_reload	boolean	No	Restart every instance
timeout	integer	No	Seconds to wait (1-30)
