/api/triggers

GET

Summary: List event triggers

You can filter triggers using parameters specified below. For any filter field that can get multiple options, you can specify them using comma-separated string, or with standard query string mechanism - repeating given field, like in `"/tasks?owner=1&owner=2"` (this will return all tasks belonging to user 1 OR user 2)

Parameters

Name	Type	Required	Description
name	string	No	
created_at__gte	string	No	
created_at__lte	string	No	
preset_name	string	No	
preset_name__isnull	boolean	No	
owner	array	No	Multiple values may be separated by commas.
name__iregex	string	No	
actions	string	No	Filter by action
script_path	string	No	Filter by script path
ordering	string	No	Which field to use when ordering the results.
page	integer	No	A page number within the paginated result set.
page_size	integer	No	Number of results to return per page.
show_all	boolean	No	Include internal triggers

Name	Type	Required	Description
export	boolean	No	Return exportable fields only
