REST API Reference · Generated June 11, 2026 · logzilla.ai/docs/rest-api-reference/api-widgets

/api/widgets

GET

Summary: List all widgets

List is always filtered by owner, unless you have permission for managing widgets AND set "show_all" parameter - then you'll see all widgets.

Parameters

Name	Type	Required	Description
title	string	No	
ordering	string	No	Which field to use when ordering the results.
page	integer	No	A page number within the paginated result set.
page_size	integer	No	Number of results to return per page.
show_all	boolean	No	Do not filter objects owned by current user
export	boolean	No	Return exportable fields only

Responses

200

POST

Summary: Create a new widget

Parameters

Name	Type	Required	Description
export	boolean	No	Return exportable fields only

Request Body

```
{  
  "example": "request body"  
}
```
